VBS AUDIO

ULTIMATE HIGH-END AUDIO EQUIPMENT

**VBS PRODUCTS ARE DESIGNED TO ENSURE ABSOLUTE SIGNAL INTERGRITY
AND CLEAR PRECISE SOUND TRANSMISSION TO ENJOY
TOTALLY NEW LISTENING EXPERIENCE**

- RCA CABLES - XLR BALANCED - POWER CORDS -
- SPEAKER CABLES - DIGITAL CABLES - POWER STRIP -

Phono Line

VBS Audio – The Hidden Mastery Behind

In a world flooded with high-end audio brands boasting exotic materials and inflated marketing claims, VBS Audio quietly operates in an entirely different league — one defined not by volume, but by vision, time, and scientific precision.

At the heart of VBS Audio's philosophy is a singular goal: to preserve signal purity at a level no conventional cable can match.

Beyond OCC – A Proprietary Metallurgical Breakthrough

While the majority of the audiophile world relies on licensed OCC (Ohno Continuous Cast) copper, VBS Audio has gone further — developing a proprietary monocrystalline copper technology produced entirely in-house. This isn't merely refined copper. It's a material innovation that takes several days per batch to form — a process that ensures a continuous, unbroken crystal lattice structure with no commercial equivalent.

Every meter of conductor is the result of painstaking thermal control, slow extrusion, and metallurgical discipline — a process so labor-intensive that only a limited number of cables can be produced per month.

Total Signal Chain Integrity

Unlike other cable manufacturers that source third-party connectors, VBS Audio machines its own plugs and terminals — using the same proprietary monocrystalline copper as the internal conductor. No dissimilar metals. No plating. No bottlenecks in the signal path. From source to destination, signal flow remains uninterrupted and uncolored.

No Marketing, No Noise – Just Sound

VBS Audio does not advertise. It doesn't need to. Clients discover VBS Audio products through referral, experience, and the rare honesty of true listening. When placed in a reference-grade system, these cables consistently outperform even the most expensive offerings from globally recognized brands — not because of hype, but because of what they don't do:

- They don't distort.
- They don't mask.
- They don't impose character.

They reveal, in full resolution and with breathtaking transparency.

Built for Those Who Truly Listen

The VBS Audio artifacts are not a product of trend — they are a product of obsession. Created for discerning listeners who demand truth over prestige, essence over excess, and engineering over ego.

VBS AUDIO price list: Wave Line

Interconnect cables RCA length 1m :

Wave IC - set of 2 . . . . . 400,00 EUR

Interconnect cables XLR length 1m :

Wave BC - set of 2 . . . . . 300,00 EUR

Speaker cables length 2m, terminated :

Wave SP - set of 2 . . . . . 400,00 EUR

USB digital cable length 1m:

Wave U -. . . . . 150,00 EUR

S/PDIF digital cable length 1m:

Wave S -. . . . . 200,00 EUR

AES/EBU digital cable length 1m:

Wave A -. . . . . 150,00 EUR

Ethernet digital cable length 1.5m

Wave E -. . . . . 200,00 EUR

Power cable length 1.5m

Wave POWC - . . . . . 350,00 EUR

Recommended retail prices, VAT and local taxes not included.
